# The iQ Method - Custom Tailored Refractive Surgery

The method that expands the possibilities of refractive surgery  
The optimal solution for reading glasses and multifocals

The iQ method is our most advanced treatment. It is suitable for a greater number of people, including those who in the past were found to be unsuitable for refractive surgery.

The procedure is very accurate and extremely safe. It allows for a quick and easy recovery, and for an immediate return to normal life.

The iQ method is also the best and safest alternative for those who do not wish to suffer the long and painful recovery involved in methods such as LASEK, PRK or ASA.

**With the iQ method recovery is quick and painless with immediate return to normal life**

**The iQ method is the safe alternative to painful recovery after PRK**

**The iQ method is the right way to treat: high myopia, thin corneas, far-sightedness, and cylinders**

## The iQ method – the optimal solution for reading glasses and multifocals

Around the mid 40's, there is a gradual deterioration in near vision. Many who never needed glasses in the past, now need reading glasses, and as the years go by, they also depend on glasses for distance or, alternatively, wear multifocals.

Now at the iClinic, through the use of the iQ method, you may restore your eyesight to any distance to what it was when you were younger, all with a quick, safe and painless procedure.

**The iQ method is also suitable for those who are 60 and 70 years old, and also for those who need glasses after cataract surgery.**

**Dr. Ariel Wender,**  
medical manager at iClinic

## The iQ method is suitable for many who were found unsuitable for laser procedures in the past

The iQ method expands the possibilities of refractive surgery. Those with high myopia, and even very high myopia, can go back to seeing clearly without glasses. With the iQ method thin corneas can be treated with the same level of accuracy and safety as normal corneas. Similarly, the procedure works for those with a cylinder, or farsightedness and even extreme farsightedness, all with a painless procedure, and immediate return to normal life.

Dear Members,

I am pleased to present the annual edition of the Diplomatic Club Medical Directory as a service to the diplomatic corp.

The aim of the bulletin is to assist diplomats and their families and staff who often come to Israel without knowledge of Hebrew, and perhaps without foreign health insurance that would cover them adequately in the event of emergencies or health problem.

We are greatly indebted to the local doctors and medical centers that have agreed to be listed in the Diplomatic Club Medical Bulletin, and for their agreement to accept the international health insurance scheme outlined.

We also thank the Ministry of Health of Israel for appreciating the complex problem of health insurance for diplomatic staff, and for supporting the Medical Bulletin.

We too understand the difficulties of living in a foreign country and hope that this service will prove helpful to diplomatic staff and their families.

Sincerely Yours

Julia Verdel

General Manager

## IMPORTANT NOTE

- Any entry in the medical directory is a public information service only and is not intended to serve any other purpose.
- Entry in the directory is voluntary and neutral and is not an advertisement or a recommendation over any similar facilities not entered.
- Information in the directory will be updated and re-published once a year. While it is intended to be as accurate as possible, the publishers are not responsible for inevitable changes that occur with time.

# Assuta Medical Centers

The leading private network & the largest surgical center in Israel  
Offering quality medical services accredited by JCI

You can rely on our experts. Here you will find a wide range of medical services, the most advanced equipment and proven professional experienced staff.

- ▶ 1,500 leading physicians and surgeons
- ▶ State-of-the-art diagnostic, operative and surgical technologies including Da-Vinci robotic system
- ▶ Luxury, comfort and privacy – in our fully equipped wards, including a personal computer system beside each bed
- ▶ Acute Diagnostic Unit - all medical exams perform on site within 72 hours
- ▶ High standard oncology treatments - chemotherapy, radiotherapy & consultations
- ▶ High availability

### Dr. Z. Mesner D.M.D, PH.D

**Specialization: Specialist in Periodontics & Implantology**

📞 050-5767388 / 052-3832390 📠 03-7306782  
✉️ drmesnerzvi@gmail.com  
📍 4 Smuts Blvd St., Tel-Aviv 62009  
🏠 Private practice

**Reception Hours:** Sun.&Thu. 9.30-19.00  
Wen 9.30-14.00

The leading trend in dentistry in the last years is to insert implants and complete treatments in one day. In spite of that, due to my long time experience in treating gum diseases (periodontics) and in cooperation with general dentists I still believe in the essential and patient process of treatment of diseased gums and affected teeth. Accurate diagnosis of the state of health of teeth and gums may need several meetings in order to improve oral hygiene before taking final decisions. The final treatment plan states which teeth need gum operation, which teeth have to be removed and where implants should be inserted.

Controlled oral hygiene is necessary in all stages of treatments, and constant connection with the general dentist is needed.

Daily and efficient cleaning of teeth and implants is very important, since gum diseases around implants is more traumatic than around teeth.

A few words about me: I studied and specialized in Israel, Norway and England. I have many years of experience. I work in my private clinic which has a long reputation, with familiar direction and a devoted team near me.

6. Dr. Artzi Edward - Dental Surgeon. 4 Mapo St., Haifa, Tel: 04-8597371, e-mail: drartzi@yahoo.com. Hebrew, English.
7. Dr. Yaron Yoav - Dental Surgeon (Implants, Prosthodontics and General dentistry). 20 Hacarmel St., Ganei Tikva. Tel: 074-7033353, e-mail: dryaron@orange.net.il, site: www.dr-yaron.co.il. Hebrew, English
